- Permit Inspection
- Traffic Engineering

PROJECT OVERVIEW

The City of Carpinteria, incorporated in 1965, is a small but growing city with changing needs, for which MNS has helped to provide support. For Carpinteria, the flexibility afforded by hiring through MNS was key, allowing a multitude of vital projects to move forward quickly and with the most qualified experts for each project smoothing the way.

MNS has fulfilled a variety of roles at the City of Carpinteria, ranging from Public Works Director/City Engineer and City Surveyor to Development Review and Inspection. In addition, we recently added construction management services to the list of staff augmentation positions we have filled for the City.

The continued use of consultant staff augmentation has proved an asset to the City especially during the recessions of 1990 and 2008, when flexibility became vital to many public agencies.

The depth of MNS staffers' expertise has helped to deliver a variety of key projects during this time, including projects in the following major areas:

- Transportation improvement
- Flood control maintenance
- Pavement rehabilitation (ARRA)
- Floodplain management
- Survey control
